Subject index

Acetobacter turbidans
Cephalosporin synthesis, Hydrolytic reactions, Synthetic reactions; 239
Acinetobacter calcoaceticus
Immobilization, D-xylulose, Xylose isomerase; 537
Acrylic polymers
Protein purification, Polyampholytes, Aqueous two-phase partition; 115
N-acylation
Dimethyl sulfoxide, *N*-acyloxysuccinimide, Lipoxygenase, Chemical modification; 474
N-acyloxysuccinimide
Lipoxygenase, Chemical modification, N-acylation, Dimethyl sulfoxide; 474
Additives
Glucose oxidase, Enzyme stability; 498
Adsorption
Lignin, xylan, Inactivation, Cellulase, *Trichoderma reesei*, Endoglucanases, Multiple forms; 503
pH, Temperature, Ionic strength, *Trichoderma reesei*, Cellulase; 675
Affinity flocculation
Cell debris removal, Homogenate clarification, Borates; 357
Alcohol dehydrogenase
Chemical oscillator, pH dependence, Dehydrogenase; 479
Alcoholic beverage production
Bakery yeast, Ethanol fermentation, *Juniper communis*, Juniper-flavored spirit; 440
Algae
Chlorella, Alginate-entrapment, Urea, Co-immobilization, Cell/urease; 207
Alginate
Deactivation, Mass balance, β-Galactosidase, Carbodiimide coupling; 606
Alginate-entrapment
Urea, Co-immobilization, Cell/urease, Algae, Chlorella; 207
Alkaloids
Insecticides, Vasodilators, Enzyme inhibitors, Streptomyces, Secondary metabolites, Herbicides, Antiparasitic agents; 455
Alkane mono-oxygenase
Alkene mono-oxygenase, Chiral epoxyalkanes, Methane mono-oxygenase; 214
Alkene mono-oxygenase
Chiral epoxyalkanes, Methane mono-oxygenase, Alkane mono-oxyenase; 214
Amino acid
Esterification, Solvent effect, α-Chymotrypsin; 582
Amino acids
Non-growth association, Kinetics; 110
D-amino acids
Arthrobacter species, D-hydantoinase, Dihydroprimidinase, D-n-carbamylamino acid amidohydrolase, Stereoselective; 618
Amylase
Silicone beads, *Escherichia coli*, Immobilization; 518
Schwanniomyces castellii, Starch hydrolysis, Kinetics; 156
Amyloglucosidase
Ethanol production, Sago starch, Simultaneous saccharification and fermentation, Immobilization, *Zymomonas mobilis*; 426
Anaerobic digestion
UASB reactor, Sodium, Toxicity, Inhibition, Methanogenesis, Granular sludge, Methanothrix; 24
Analysis
Chromatography, Steam treatment, Wood sugars, Fermentation; 37

Anthraquinone dyes
Lactate dehydrogenase, Zonal affinity chromatography, Batch adsorption, Dual character adsorption, Porous cellulose beads; 568
Antiparasitic agents
Alkaloids, Insecticides, Vasodilators, Enzyme inhibitors, Streptomyces, Secondary metabolites, Herbicides; 455
Aqueous two-phase partition
Acrylic polymers, Protein purification, Polyampholytes; 115
Arthrobacter simplex
Two-liquid phase biocatalysis, Δ^1-dehydrogenation, Stability, Log P, Steroids; 669
Arthrobacter species
D-hydantoinase, Dihydropyrimidinase, D-*N*-carbamyl-amino acid amidohydrolase, Stereoselective, D-amino acids; 618
Aspergillus japonicus
Cellulolytic enzymes, Natural and modified cellulosic substrates, Induction and repression; 85
Extracellular β-glucosidase, Purification and characterization; 91
Endoglucanase, Multiple forms, Purification and characterization; 100
Aspergillus lipase
Enantioselective hydrolysis, Pantoyl lactone, *Saccharomyces cerevisiae*; 689
Aspergillus niger
Ultraviolet mutation, Carbendazim-resistant mutant, Colony morphology, Cellulolytic activity; 442
Pellet, Citric fermentation; 188
Pentose phosphate pathway, Glycolysis, Citric acid; 33
Aspergillus niger G-13 mutant
Culture optimization, Glucose oxidase production; 508
Aureobasidium pullulans
Purification, Pectin hydrolase, Pectin lyase; 682
Avicel-adsorbing carboxymethylcellulase:
Mesophilic *Humicola grisea* Fb, Hydrolysis, Lignocellulose; 368
Avicelase
Cellulomonas flavigena, CMCase; 626

Bacillus anthracis
Immunosorbent chromatography, Monoclonal antibodies; 14
Bacillus megaterium (pCK98)
Endo-β-1,4-glucanase, Purification, characterization, Cellooligosaccharides, Reaction mode, Transglycosylation, Bacillus subtilis; 347
Bacillus stearothermophilus
Escherichia coli, Extracellular production, Mutant isolation, Cloning; 42
Bacillus subtilis
Bacillus megaterium (pCK98), Endo-β-1,4-glucanase Purification, Characterization, Cellooligosaccharides, Reaction mode, Transglycosylation; 347
Scenedesmus obliquus, Carrageenan, Immobilization Oxygen; 19
Bacteria
Fungi, Batch fermentation, Continuous fermentation, Xylose, Fermentation, Yeasts; 66
Bacterial cellulases
Lignocellulosics, Saccharification; 750
Bacterial immobilization
β-subtilis macrofibers, Entanglement, Physical attachment; 418
Bakery yeast
Ethanol fermentation, *Juniper communis*, Juniper-flavored spirit, Alcoholic beverage production; 440
Batch adsorption
Dual character adsorption, Porous cellulose beads Anthraquinone dyes, Lactate dehydrogenase, Zonal affinity chromatography; 568
Batch fermentation
Variable cell yield coefficient, Gene level control, Medium-dependent oxygen transfer model, *Kluyveromyces fragilis*; 165
Continuous fermentation, Xylose, Fermentation, Yeasts Bacteria, Fungi; 66
Batch kinetics
Xanthan, Pullulan, PHB, Biopolymer; 326
Benzene degradation
cis-benzeneglycol formation, *Pseudomonas*, Mutant; 134
Biocatalysis
Organic media, Biphasic systems; 736
Biocatalysis in organic media
Stabilizing enzymes, Immobilized enzymes, Surfactants in solution, Enzymes in organic synthesis; 710
Biodegradation
Ligninolytic bacteria, Lignin, Lignocellulose, Lignin-related compounds; 646
Biofilm reactor
Ethanol, Packed bed bioreactor; 390
Biopolymer
Batch kinetics, Xanthan, Pullulan, PHB; 326
Bioreactor
Fermentation, Lignin peroxidase, Ligninase, Enzyme production, *Phanerochaete chrysosporium*, White-rot fungi, Immobilized fungi; 410
Cell concentration, Cytometabolism diffusion; 161
Bioreactor-separator
Continuous bioconversion; 593
Biotin
D-xylose, Ethanol, Xylitol, Yeast, *Pachysolen tannophilus*, *Candida guilliermondii*, Growth, Limitation; 81
Biphasic systems
Biocatalysis, Organic media; 736
Borates
Affinity flocculation, Cell debris removal, Homogenate clarification; 357
Bordetella pertussis
Immobilized adenylate cyclase, cAMP synthesis; 293
Brewers' yeast
Riboflavin production, kinetics; 754

Calcium alginate
Trichosporon cutaneum, Oxygen uptake rate, Effective oxygen diffusivity, S.E.M. observation, Gel construction, Morphological development; 284
Serratia marcescens, Protease, Enzymatic hydrolysis, Milk proteins, Immobilized cells; 2
Calcium-alginate beads
Lactic acid production, Cheese whey, *Lactobacillus helveticus*; 725
cAMP synthesis
Bordetella pertussis, Immobilized adenylate cyclase; 293
Candida boidinii
Candida utilis, Lysis, Microbial food, Glycogen, Yeast, *Hansenula polymorpha*; 586
Candida guillermondii
Saccharomyces cerevisiae, Furfural, 5-hydroxymethylfurfural; 315
Growth, Limitation, Biotin, D-xylose, Ethanol, Xylitol, Yeast, *Pachysolen tannophilus*; 81
Candida utilis
Lysis, Microbial food, Glycogen, Yeast, *Hansenula polymorpha*, *Candida boidinii*; 586
Thiol compound, Surfactant, Surface-active agent, Extraction, Uricase; 52
D-N-carbamyl-amino acid amidohydrolase:
Stereoselective, D-amino acids, Arthrobacter species, D-hydantoinase, Dihydropyrimidinase; 618
Carbendazim-resistant mutant
Colony morphology, Cellulolytic activity, *Aspergillus niger*, Ultraviolet mutation; 442
Carbodiimide coupling
Alginate, Deactivation, Mass balance, β-Galactosidase; 606
Carboxyl esterase
Saccharomyces cerevisiae, Enantioselective hydrolysis; 744
Carboxymethyl xylan
Mushroom xylanase, *Termitomyces clypeatus*, Endoxylanase; 563

Carrageenan
Immobilization, Oxygen, *Bacillus subtilis*, *Scenedesmus obliquus*; 19
Immobilized cells, L-DOPA, *Escherichia intermedia*; 729
κ-carrageenan
Immobilized cells, *Streptomyces clavuligerus*, Oxygen uptake; 440
Catharanthus roseus
Serpentine, Selected cell line, Long-term stability; 532
Cell concentration
Cytometabolism diffusion, Bioreactor; 161
Cell debris removal
Homogenate clarification, Borates, Affinity flocculation; 357
Cell/urease
Algae, Chlorella, Alginate-entrapment, Urea, Coimmobilization; 207
Cellooligosaccharides
Reaction mode, Transglycosylation, *Bacillus subtilis*, *Bacillus megaterium* (pCK98), Endo-β-1,4-glucanase, Purification, Characterization; 347
Cellulase
Trichoderma reesei, Endoglucanases, multiple forms, Adsorption, Lignin, xylan, Inactivation; 503
Thermoascus aurantiacus, Thermophilic fungus, Derepression, Regulation, Induction; 262
Hypercellulolytic mutant, Constitutive β-D-glucosidase, *Trichoderma reesei*; 341
Adsorption, pH, Temperature, Ionic strength, *Trichoderma reesei*; 675

Cellulolytic activity
Aspergillus niger, Ultraviolet mutation, Carbendazim-resistant mutant, Colony morphology; 442
Cellulolytic enzymes
Natural and modified cellulosic substrates, Induction and repression, *Aspergillus japonicus*; 85
Cellulomonas flavigena
CMCase, Avicelase; 626
Cephalosporin synthesis
Hydrolytic reactions, Synthetic reactions, *Acetobacter turbidans*; 239
Characterization
Cellooligosaccharides, Reaction mode, Transglycosylation, *Bacillus subtillis*, *Bacillus megaterium* (pCK98), Endo-β-1,4-glucanase, Purification; 347
Cheese whey
Lactobacillus helveticus, Calcium-alginate beads, Lactic acid production; 725
Chemical modification
N-acylation, Dimethyl sulfoxide, *N*-acyloxysuccinimide, Lipoxygenase; 474
Chemical oscillator
pH dependence, Dehydrogenase, Alcohol dehydrogenase; 479
Chiral epoxyalkanes
Methane mono-oxygenase, Alkane mono-oxygenase, Alkene mono-oxygenase; 214
Chitinase
Protease, Electrophoresis, Mycoparasitism, Chromatography, *Trichoderma harzianum*, 1,3-β-D glucanase; 180
Chlorella
Scenedesmus, Green algae, Enzymatic hydrolysis, Protein hydrolysate; 233
Alginate-entrapment, Urea, Co-immobilization, Cell/urease, Algae; 207
Chloroplasts
Stacking, Stability, Hydrogen and oxygen production, Hydrogenase, Manganese, Divalent cations; 123
Chromatography
Trichoderma harzianum, 1,3-β-D glucanase, Chitinase, Protease, Electrophoresis, Mycoparasitism; 180
Steam treatment, Wood sugars, Fermentation, Analysis; 37
α-Chymotrypsin
Amino acid, Esterification, Solvent effect; 582
cis-benzeneglycol formation
Pseudomonas, Mutant, Benzene degradation; 134
Citric acid
Aspergillus niger, Pentose phosphate pathway, Glycolysis; 33
Citric fermentation
Aspergillus niger, Pellet; 188
Cloning
Bacillus stearothermophilus, *Escherichia coli*, Extracellular production, Mutant isolation; 42
Clostridium thermocellum
Escherichia coli, β-glucosidase, Molecular cloning; 9
CMCase
Avicelase, *Cellulomonas flavigena*; 626
Codeine
Morphine, Tyrosine, Tyrosinase, Tyrosine phenollyase, Tyrosine decarboxylase, Monoamine oxidase, Norlaudanosoline synthase; 219
Coenzyme regeneration
Reactor performance, Hydroxystereoid dehydrogenases, Two-phase systems, Steroids; 333
Co-immobilization
Cell/urease, Algae, Chlorella, Alginate-entrapment, Urea; 207
Colony morphology
Cellulolytic activity, *Aspergillus niger*, Ultraviolet mutation, Carbendazim-resistant mutant; 442
Conformational change
Serine 152, Spin label, Lipase, Coulter counter, Cooperativity, Substrate inhibition; 352
Constitutive β-D-glucosidase
Trichoderma reesei, Cellulase, Hypercellulolytic mutant; 341
Continuous bioconversion
Bioreactor-separator; 593
Continuous culture
Enzyme overproduction, Yeast, *Kluyveromyces fragilis*, Exo-inulase, β-fructofuranosidase; 297
Continuous fermentation
Xylose, Fermentation, Yeasts, Bacteria, Fungi, Batch fermentation; 66
Controlled pore glass
Myeloperoxidase, Immobilization; 656
Cooperativity
Substrate inhibition, Conformational change, Serine 152, Spin label, Lipase, Coulter counter; 352
Coulter counter
Cooperativity, Substrate inhibition, Conformational change, Serine 152, Spin label, Lipase; 352
Covalent attachment
Glyoxyl sepharose CL gels, Immobilization, Stabilization, Insolubilization; 375
Culture optimization
Glucose oxidase production, *Aspergillus niger* G-13 mutant; 508
Cytometabolism diffusion
Bioreactor, Cell concentration; 161
p-Cresol
Polyphenol oxidase, Enzyme electrode, Organic solvents; 543

Deactivation
Mass balance, β-Galactosidase, Carbodiimide coupling, Alginate; 606
Dehydrogenase
Alcohol dehydrogenase, Chemical oscillator, pH dependence; 479
Δ^1-dehydrogenation
Stability, Log P, Steroids, Arthrobacter simplex, Two-liquid phase biocatalysis; 669
Denaturing conditions
Metal (II) effects, D-Xylose isomerase; 695
1-Deoxynojirimycin
Somatomedin C, Invertase, Secretion, Yeast; 246
6-Deoxysugars
Rhamnose, Fucose, Microbial Polysaccharides, Furaneol, Flavoring agent; 198
Derepression
Regulation, Induction, Cellulase, *Thermoascus aurantiacus*, Thermophilic fungus; 262
Dextran
Dextran fermentation, *Leuconostoc mesenteroides*, Microbial exopolysaccharides, Rheological characterization; 686
Dextran fermentation
Leuconostoc mesenteroides, Microbial exopolysaccharides, Rheological characterization, Dextran; 686
Diatomaceous earth
Lipase, Solvent, Interesterification; 47
Dihydropyrimidinase
D-N-carbamyl-amino acid amidohydrolase, Stereoselective, D-amino acids, Arthrobacter species, D-Hydantoinase; 618
Dimethyl adipimidate
Immobilized trypsin, Trypsin; 143
Dimethyl sulfoxide
N-acyloxysuccinimide, Lipoxygenase, Chemical modification, N-acylation; 474
Disintegration of microorganisms
Intracellular enzymes, Mechanical cell rupture, Protein release, Mixer mill, Wet griding, Small-scale disruption; 552
Divalent cations
Chloroplasts, Stacking, Stability, Hydrogen and oxygen production, Hydrogenase, Manganese; 123
Dual character adsorption
Porous cellulose beads, Anthraquinone dyes, Lactate dehydrogenase, Zonal affinity chromatography, Batch adsorption; 568

Effective oxygen diffusivity
S.E.M. observation, Gel construction, Morphological development, Calcium alginate, *Trichosporon cutaneum*, Oxygen uptake rate; 284
Electrochemistry
Electron transfer, Thylakoids, Photosystem; 691
Electron transfer
Thylakoids, Photosystem, Electrochemistry; 691
Electrophoresis
Mycoparasitism, Chromatography, *Trichoderma harzianum*, 1,3-β-D glucanase, Chitinase, Protease; 180
ELISA
Immunohistochemistry, Human α_1-macroglobulin, Monoclonal antibodies; 524
Enantioselective hydrolysis
Pantoyl lactone, Saccharomyces cerevisiae, Aspergillus lipase; 689
Carboxyl esterase, *Saccharomyces cerevisiae*; 744
Endo-β-1,4-glucanase
Purification, Characterization, Cellooligosaccharides, Reaction mode, Transglycosylation, *Bacillus subtilis*, *Bacillus megaterium* (pCK98); 347
Endoglucanase
Multiple forms, Purification and characterization, *Aspergillus japonicus*; 100
Endoglucanases, multiple forms
Adsorption, Lignin, xylan, Inactivation, Cellulase, *Trichoderma reesei*; 503
Endoxylanase
Carboxymethyl xylan, Mushroom xylanase, *Termitomyces clypeatus*; 563

Entanglement
Physical attachment, Bacterial immobilization, *B. subtilis macrofibers*; 418
Enzymatic hydrolysis
Protein hydrolysate, *Chlorella*, *Scenedesmus*, Green algae; 233
Milk proteins, Immobilized cells, Calcium alginate, *Serratia marcescens*, Protease; 2
Enzymatic saccharification
Pichia stipitis R, Ethanol, Extractive butanol fermentation, SO_2-prehydrolysis, Lignocellulosics; 660
Enzyme
Reversed micelle, Invertase, Sodium lauryl sulfate, Sodium tauroglycocholate; 302
Enzyme confinement
Kluyveromyces, β-D-galactosidase, EC 3.2.1.23, Permeabilized cells; 611
Enzyme electrode
Organic solvents, *p*-cresol, Polyphenol oxidase; 543
Enzyme families
Streptomyces, Xylan hydrolysis; 403
Enzyme-inhibitor
Trypsin-agarose, Insolubilization-stabilization, Enzyme-support attachment; 227
Enzyme inhibitors
Streptomyces, Secondary metabolites, Herbicides, Antiparasitic agents, Alkaloids, Insecticides, Vasodilators; 455
Enzyme overproduction
Yeast, *Kluyveromyces fragilis*, Exo-inulase, β-fructofuranosidase, Continuous culture; 297
Enzyme production
Phanerochaete chrysosporium, White-rot fungi, Immobilized fungi, Bioreactor, Fermentation, Lignin peroxidase, Ligninase; 410
Enzyme stability
Additives, Glucose oxidase; 498
Enzyme-support attachment
Enzyme-inhibitor, Trypsin-agarose, Insolubilization-stabilization; 227
Enzymes in organic synthesis
Biocatalysis in organic media, Stabilizing enzymes, Immobilized enzymes, Surfactants in solution; 710
Equilibrium shift
Hydration history, Reverse hydrolysis; 486
Escherichia coli
β-glucosidase, Molecular cloning, *Clostridium thermocellum*; 9
Extracellular production, Mutant isolation, Cloning, *Bacillus stearothermophilus*; 42
Immobilization, Amylase, Silicone beads; 518
Immobilized, Recombinant, Proinsulin, Excretion; 601
Molecular cloning, *Ruminococcus albus*, β-glucosidase; 559
Escherichia intermedia
Carrageenan, Immobilized cells, L-DOPA; 729
Esterification
Solvent effect, α-Chymotrypsin, Amino acid; 582
Ethanol
Packed bed bioreactor, Biofilm reactor; 390
Extractive butanol fermentation, SO_2-prehydrolysis, Lignocellulosic, Enzymatic saccharification, *Pichia stipitis* R; 660
Xylitol, Yeast, *Pachysolen tannophilus*, *Candida guilliermondii*, Growth, Limitation, Biotin, D-xylose; 81
Ethanol fermentation
Juniper communis, Juniper-flavored spirit, Alcoholic beverage production, Bakery yeast; 440
Temperature effect, *Zymomonas mobilis*, Kinetic model; 431
Ethanol production
Sago starch, Simultaneous saccharification and fermentation, Immobilization, *Zymomonas mobilis*, Amyloglucosidase; 426
Excretion
Escherichia coli, Immobilized, Recombinant, Proinsulin; 601
Exo-inulase
β-fructofuranosidase, Continuous culture, Enzyme overproduction, Yeast, *Kluyveromyces fragilis*; 297
Exopolysaccharide
Microbial exopolysaccharide, *Nigrospora oryzae* var. *glucanicum*; 547
Extracellular β-glucosidase
Purification and characterization, *Aspergillus japonicus*; 91
Extracellular production
Mutant isolation, Cloning, *Bacillus stearothermophilus*, *Escherichia coli*; 42
Extraction
Uricase, *Candida utilis*, Thiol compound, Surfactant, Surface-active agent; 52
Extractive butanol fermentation
SO_2-prehydrolysis, Lignocellulosics, Enzymatic saccharification, *Pichia stipitis* R, Ethanol; 660

Fed batch fermentation
Yeast, Mold, Pulp mill effluent, Single cell protein; 280
Fermentation
Analysis, Chromatography, Steam treatment, Wood sugars; 37
Lignin peroxidase, Ligninase, Enzyme production, *Phanerochaete chrysosporium*, White-rot fungi, Immobilized fungi, Bioreactor; 410
Yeasts, Bacteria, Fungi, Batch fermentation, Continuous fermentation, Xylose; 66
Flavoring agent
6-deoxysugars, Rhamnose, Fucose, Microbial polysaccharides, Furaneol; 198
β-fructofuranosidase
Continuous culture, Enzyme overproduction, Yeast, *Kluyveromyces fragilis*, Exo-inulase; 297
Fucose
Microbial polysaccharides, Furaneol, Flavoring agent, 6-deoxysugars, Rhamnose; 198
Fungi
Batch fermentation, Continuous fermentation, Xylose, Fermentation, Yeasts, Bacteria; 66
Furaneol
Flavoring agent, 6-deoxysugars, Rhamnose, Fucose, Microbial polysaccharides; 198
Furfural
5-hydroxymethylfurfural, *Candida guilliermondii*, *Saccharomyces cerevisiae*; 315

β-Galactosidase
Carbodiimide coupling, Alginate, Deactivation, Mass balance; 606
β-D-galactosidase, EC 3.2.1.23
Permeabilized cells, Enzyme confinement, *Kluyveromyces*; 611
Gel construction
Morphological development, Calcium alginate, *Trichosporon cutaneum*, Oxygen uptake rate, Effective oxygen diffusivity, S.E.M. observation; 284
Gene level control
Medium-dependent oxygen transfer model, *Kluyveromyces fragilis*, Batch fermentations, Variable cell yield coefficient; 165
1,3-β-D Glucanase
Chitinase, Protease, Electrophoresis, Mycoparasitism, Chromatography, *Trichoderma harzianum*; 180
Glucoamylase
Starch, Ultrafiltration reactor, Saccharification
Glucose oxidase production
Aspergillus niger G-13 mutant, Culture optimization; 508
β-glucosidase
Escherichia coli, Molecular cloning, *Ruminococcus albus*; 559
Molecular cloning, *Clostridium thermocellum*, Escherichia coli; 9
Glycogen
Yeast, *Hansenula polymorpha*, *Candida boidinii*, *Candida utilis*, Lysis, Microbial food; 586
Glycolysis
Citric acid, *Aspergillus niger*, Pentose phosphate pathway; 33
Glyoxyl sepharose CL gels
Immobilization, Stabilization, Insolubilization, Covalent attachment; 375
Granular sludge
Methanothrix, Anaerobic digestion, UASB reactor, Sodium, Toxicity, Inhibition, Methanogenesis; 24
Green algae
enzymatic hydrolysis, Protein hydrolysate, *Chlorella*, *Scenedesmus*; 233
Growth
Limitation, Biotin, D-xylose, Ethanol, Xylitol, Yeast, *Pachysolen tannophilus*, *Candida guilliermondii*; 81

Hansenula polymorpha
Candida boidinii, *Candida utilis*, Lysis, Microbial food, Glycogen, Yeast; 586
Herbicides
Antiparasitic agents, Alkaloids, Insecticides, Vasodilators, Enzyme inhibitors, Streptomyces, Secondary metabolites; 455
Homogenate clarification
Borates, Affinity flocculation, Cell debris removal; 357
Human
Monoclonal antibodies, ELISA, Immunohistochemistry; 524
D-Hydantoinase
Dihydropyrimidinase, D-*N*-carbamyl-amino acid amidohydrolase, Stereosel-

ective, D-amino acids, Arthrobacter species; 618
Hydration history
Reverse hydrolysis, Equilibrium shift; 486
Hydrogen and oxygen production
Hydrogenase, Manganese, Divalent cations, Chloroplasts, Stacking, Stability; 123
Hydrogenase
Manganese, Divalent cations, Chloroplasts, Stacking, Stability, Hydrogen and oxygen production; 123
Hydrolysis
Lignocellulose, Avicel-adsorbing carboxymethylcellulase, *Mesophilic Humicola grisea* Fb; 368
Hydrolytic reactions
Synthetic reactions, Acetobacter turbidans, Cephalosporin synthesis; 239
5-hydroxymethylfurfural
Candida guillermondii, Saccharomyces cerevisiae, furfural; 315
Hydroxysteroid dehydrogenase
Two-phase systems, Steroids, Coenzyme regeneration, Reactor performance; 333
Hypercellulolytic mutant
Constitutive β-D-glucosidase, *Trichoderma reesei*, Cellulase; 341

Immobilization
Amylase, Silicone beads, *Escherichia coli*; 518
Controlled pore glass, Myeloperoxidase; 656
D-xylulose, Xylose isomerase, *Acinetobacter calcoaceticus*; 537
Oxygen, *Bacillus subtilis, Scenedesmus obliquus*, Carrageenan; 19
Stabilization, Insolubilization, Covalent attachment, Glyoxyl sepharose CL gels; 375
Zymomonas mobilis, Amyloglucosidase, Ethanol production, Sago starch, Simultaneous saccharification and fermentation; 426
Immobilization of yeasts
Saccharomyces cerevisiae, Organic solvents, Tolerance to ethanol, Polyacrylamide; 273
Immobilized
Recombinant, Proinsulin, Excretion, *Escherichia coli*; 601
Immobilized adenylate cyclase
cAMP synthesis, *Bordetella pertussis*; 293
Immobilized bioreactors
Porous cellulose beads, Immobilized invertase, Stirred tank reactor, Packed bed reactor, Kinetics of saccharose hydrolysis; 306
Immobilized cells
Calcium alginate, *Serratia marcescens*, Protease, Enzymatic hydrolysis, Milk Proteins; 2
L-DOPA, *Escherichia intermedia*, Carrageenan; 729
Streptomyces clavuligerus, Oxygen uptake, κ-carrageenan; 151
Immobilized enzymes
Surfactants in solution, Enzymes in organic synthesis, Biocatalysis in organic media, Stabilizing enzymes; 710
Immobilized fungi
Bioreactor, Fermentation, Lignin peroxidase, Ligninase, Enzyme production, *Phanerochaete chrysosporium*, White-rot fungi; 410
Immobilized invertase
Stirred tank reactor, Packed bed reactor, Kinetics of saccharose hydrolysis, Immobilized bioreactors, Porous cellulose beads; 306
Immobilized trypsin
Trypsin, Dimethyl adipimidate; 143
Immunohistochemistry
Human α_2-macroglobulin, Monoclonal antibodies, ELISA; 524
Immunosorbent chromatography
Monoclonal antibodies, *Bacilius anthracis*; 14
Inactivation
Cellulase, *Trichoderma reesei*, Endoglucanases, multiple forms, Adsorption, Lignin, xylan; 503
Induction
Cellulase, *Thermoascus aurantiacus*, Thermophilic fungus, Derepression, Regulation; 262
Induction and repression
Aspergillus japonicus, Cellulolytic enzymes, Natural and modified cellulosic substrates; 85
Inhibition
Methanogenesis, Granular sludge, Methanothrix, Anaerobic digestion, UASB reactor, Sodium, Toxicity; 24
Insecticides
Vasodilators, Enzyme inhibitors, Streptomyces, Secondary metabolites, Herbicides, Antiparasitic agents, Alkaloids; 455
Insolubilization
Covalent attachment, Glyoxyyl sepharose CL gels, Immobilization, Stabilization; 375
Insolubilization-stabilization
Enzyme-support attachment, enzyme-inhibitor, trypsin-agarose; 227
Interesterification
Diatomaceous earth, Lipase, Solvent; 47
Intracellular enzymes
Mechanical cell rupture, Protein release, Mixer mill, Wet grinding, Small-scale disruption, Disintegration of microorganisms; 552
Invertase
Secretion, Yeast, 1-Deoxynojirimycin, Somatomedin C; 246
Sodium lauryl sulfate, Sodium tauroglycocholate, Enzyme, Reversed micelle; 302
Ionic strength
Trichoderma reesei, Cellulase, Adsorption, pH, Temperature; 675

Juniper communis
Juniper-flavored spirit, Alcoholic beverage production, Bakery yeast, Ethanol fermentation; 440
Juniper-flavored spirit
Alcoholic beverage production, Bakery yeast, Ethanol fermentation, *Juniper communis*; 440

Kinetic model
Ethanol fermentation, Temperature effect, *zymomonas mobilis*; 431
Kinetics
Amino acids, Non-growth association; 110
Amylase, *Schwanniomyces castellii*, Starch hydrolysis; 156
Brewers' yeast, Riboflavin production; 754
Kinetics of saccharose hydrolysis
Immobilized bioreactors, Porous cellulose beads, Immobilized invertase, Stirred tank reactor, Packed bed reactor; 306
Kluyveromyces
β-D-galactosidase, EC 3.2.1.23, Permeabilized cells, Enzyme confinement; 611
Kluyveromyces fragilis
Batch fermentations, Variable cell yield coefficient, Gene level control, Medium-dependent oxygen transfer model; 165
Exo-inulase, β-fructofuranosidase, Continuous culture, Enzyme overproduction, Yeast; 297

Lactate dehydrogenase
Zonal affinity chromatography, Batch adsorption, Dual character adsorption, Porous cellulose beads, Anthraquinone dyes; 568
Lactic acid production
Cheese whey, *Lactobacillus helveticus*, Calcium-alginate beads; 725
Lactobacillus helveticus
Calcium-alginate beads, Lactic acid production, Cheese whey; 725
L-DOPA
Escherichia intermedia, Carrageenan, Immobilized cells; 729
Leuconostoc mesenteroides
Microbial exopolysaccharides, Rheological characterization, Dextran, Dextran fermentation; 686
Ligand leakage
Ligand-support conjugates, Long-time ligand stability; 312
Ligand-support conjugates
Long-time ligand stability, Ligand leakage; 312
Lignin
Lignocellulose, Lignin-related compounds, Biodegradation, Ligninolytic bacteria; 646
Ligninase
Enzyme production, *Phanerochaete chrysosporium*, White-rot fungi, Immobilized fungi, Bioreactor, Fermentation, Lignin peroxidase; 410
Lignin peroxidase
Ligninase, Enzyme production, *Phanerochaete chrysosporium*, White-rot fungi, Immobilized fungi, Bioreactor, Fermentation; 410
Lignin-related compounds
Biodegradation, Ligninolytic bacteria, Lignin, Lignocellulose; 646
Ligninolytic bacteria
Lignin, Lignocellulose, Lignin-related compounds Biodegradation; 646
Lignin, xylan
Inactivation, Cellulase, *Trichoderma reesei*, Endoglucanases, multiple forms, adsorption; 503
Lignocellulose
Avicel-adsorbing carboxymethlcellulase, Mesophilic *Humicola grisea* Fb, Hydrolysis; 368

Lignin-related compounds, Biodegradation, Ligninolytic bacteria, Lignin; 646
Lignocellulosics
Enzymatic saccharification, *Pichia stipitis* R, Ethanol, Extractive butanol fermentation, SO_2-prehydrolysis; 660
Saccharification, Bacterial cellulases; 750
Limitation
Biotin, D-xylose, Ethanol, Xylitol, Yeast, *Pachysolen tannophilus*, *Candida guilliermondii*, Growth; 81
Lipase
Coulter counter, Cooperativity, Substrate inhibition, Conformational change, Serine 152, Spin label; 352
Solvent, Interesterification, Diatomaceous earth; 47
Lipolytic activity
Microorganisms, Tributyrin, Olive oil; 492
Lipoxygenase
Chemical modification, *N*-acylation, Dimethyl sulfoxide, N-acyloxysuccinimide; 474
Log P
Steroids, Arthrobacter simplex, Two-liquid phase biocatalysis, Δ^1-dehydrogenation, Stability; 669
Long-term stability
Catharanthus roseus, Serpentine, Selected cell line; 532
Long-time ligand stability
Ligand leakage, Ligand-support conjugates; 312
Lysis
Microbial food, Glycogen, Yeast, *Hansenula polymorpha*, *Candida boidinii*, *Candida utilis*; 586

Manganese
Divalent cations, Chloroplasts, Stacking, Stability, Hydrogen and oxygen production, Hydrogenase; 123
Mass balance
β-Galactosidase, Carbodiimide coupling, Alginate, Deactivation; 606
Mechanical cell rupture
Protein release, Mixer mill, Wet grinding, Small-scale disruption, Disintegration of microorganisms, Intracellular enzymes; 552
Medium-dependent oxygen transfer model
Kluyveromyces fragilis, Batch fermentations, Variable cell yield coefficient, Gene level control; 165
Mesophilic *Humicola grisea* Fb
Hydrolysis, Lignocellulose, Avicel-adsorbing carboxymethylcellulase; 368
Metal(II) effects
D-Xylose isomerase, Denaturating conditions; 695
Methane mono-oxygenase
Alkane mono-oxygenase, Alkene mono-oxygenase, Chiral epoxyalkanes; 214
Methanogenesis
Granular sludge, Methanothrix, Anaerobic digestion, UASB reactor, Sodium, Toxicity, Inhibition; 24
Methanothrix
Anaerobic digestion, UASB reactor, Sodium, Toxicity, Inhibition, Methanogenesis, Granular sludge; 24
Microbial exopolysaccharide
Nigrospora oryzae var. *glucanicum*, Exopolysaccharide; 547
Microbial exopolysaccharides
Rheological characterization, Dextran, Dextran fermentation, *Leuconostoc mesenteroides*; 686
Microbial food
Glycogen, Yeast, *Hansenula polymorpha*, *Candida boidinii*, *Candida utilis*, Lysis; 586
Microbial polysaccharides
Furaneol, Flavoring agent, 6-deoxy-sugars, Rhamnose, Fucose; 198
Microorganisms
Tributyrin, Olive oil, Lipolytic activity; 492
Milk proteins
Immobilized cells, Calcium alginate, *Serratia marcescens*, Protease, Enzymatic hydrolysis; 2
Mixer mill
Wet grinding, Small-scale disruption, Disintegration of microorganisms, Intracellular enzymes, Mechanical cell rupture, Protein release 552
Mold
Pulp mill effluent, Single cell protein, Fed batch fermentation, Yeast; 280
Molecular cloning
Clostridium thermocellum, *Escherichia coli*, β-glucosidase; 9
Ruminococcus albus, β-glucosidase, *Escherichia coli*; 559
Monoamine oxidase
Norlaudanosoline synthase, Codeine, Morphine, Tyrosine, Tyrosinase, Tyrosine phenol-lyase, Tyrosine decarboxylase; 219
Monoclonal antibodies
Bacillus anthracis, Immunosorbent chromatography; 14
ELISA, Immunohistochemistry, Human α_2-macroglobulin; 524
Morphine
Tyrosine, Tyrosinase, Tyrosine phenol-lyase, Tyrosine decarboxylase, Monoamine oxidase, Norlaudanosoline synthase, Codeine; 219
Morphological development
Calcium alginate, *Trichosporon cutaneum*, Oxygen uptake rate, Effective oxygen diffusivity, S.E.M. observation, Gel construction; 284
Multiple forms
Purification and characterization, *Aspergillus japonicus*, Endoglucanase; 100
Mushroom xylanase
Termitomyces clypeatus, Endoxylanase, Carboxymethyl xylan; 563
Mutant
Benzene degradation, benzeneglycol formation, *Pseudomonas*; 134
Mutant isolation
Cloning, *Bacillus stearothermophilus*, *Escherichia coli*, Extracellular production; 42
Mycoparasitism
Chromatography, *Trichoderma harzianum*, 1,3-β-D glucanase, Chitinase, Protease, Electrophoresis; 180
Myeloperoxidase
Immobilization, Controlled poreglass; 656
Natural and modified cellulosic substrates:
Induction and repression, *Aspergillus japonicus*, Cellulolytic enzymes; 85
Nigrospora oryzae var. *glucanicum*
Exopolysaccharide, Microbial exopolysaccharide; 547
Non-growth association
Kinetics, Amino acids; 110
Norlaudanosoline synthase
Codeine, Morphine, Tyrosine, Tyrosinase, Tyrosine phenol-lyase, Tyrosine decarboxylase, Monoamine oxidase; 219

Olive oil
Lipolytic activity, Microorganisms, Tributyrin; 492
Organic media
Biphasic systems, Biocatalysis; 736
Organic solvents
p-cresol, Polyphenol oxidase, Enzyme electrode; 543
Tolerance to ethanol, Polyacrylamide, Immobilization of yeasts, *Saccharomyces cerevisiae*; 273
Oxygen
Bacillus subtilis, *Scenedesmus obliquus*, Carrageenan, Immobilization; 19
Oxygen uptake
κ-carrageenan, Immobilized cells, *Streptomyces clavuligerus*; 151
Oxygen uptake rate
Effective oxygen diffusivity, S.E.M. observation, Gel construction, Morphological development, Calcium alginate, *Trichosporon cutaneum*; 284

Pachysolen tannophilus
Candida guilliermondii, Growth, Limitation, Biotin, D-xylose, Ethanol, Xylitol, Yeast; 81
Packed bed bioreactor
Biofilm reactor, Ethanol; 390
Kinetics of saccharose hydrolysis, Immobilized bioreactors, Porous cellulose beads, Immobilized invertase, Stirred tank reactor; 306
Pantoyl lactone
Saccharomyces cerevisiae, *Aspergillus lipase*, Enantioselective hydrolysis; 689
Pectin hydrolase
Pectin lyase, *Aureobasidium pullulans*, Purification; 682
Pectin lyase
Aureobasidium pullulans, Purification, Pectin hydrolase; 682
Pellet
Citric fermentation, Aspergillus niger; 188
Pentose phosphate pathway
Glycolysis, Citric acid, Aspergillus niger; 33
Permeabilized cells
Enzyme confinement, Kluyveromyces, B-D-galactosidase, EC 3.2.1.23; 611
pH
Temperature, Ionic strength, *Trichoderma reesei*, Cellulase, Adsorption; 675
pH dependence
Dehydrogenase, Alcohol dehydrogenase, chemical oscillator; 479

Phanerochaete chrysosporium
White-rot fungi, Immobilized fungi, Bioreactor, Fermentation, Lignin peroxidase, Ligninase, Enzyme production; 410
PHB
Biopolymer, Batch kinetics, Xanthan, Pullulan; 326
Photosynthetic bacterium
Raw starch, Starch-digestive amylase; 173
Photosystem
Electrochemistry, Electron transfer, Thylakoids; 691
Physical attachment
Bacterial immobilization, *B. subtilis* macrofibers, Entanglement; 418
Pichia stipitis R
Ethanol, Extractive butanol fermentation, SO_2-prehydrolysis, Lignocellulosics, Enzymatic saccharification; 660
Plant cell suspensions
Shear, Viability; 361
Polyacrylamide
Immobilization of yeasts, *Saccharomyces cerevisiae*, organic solvents, Tolerance to ethanol; 273
Polyampholytes
Aqueous two-phase partition, Acrylic polymers, Protein purification; 115
Polyphenol oxidase
Enzyme electrode, Organic solvents, *p*-cresol; 543
Porous cellulose beads
Anthraquinone dyes, Lactate dehydrogenase, Zonal affinity chromatography, Batch adsorption, Dual character adsorption; 568
Immobilized invertase, Stirred tank reactor, Packed bed reactor, Kinetics of saccharose hydrolysis, Immobilized bioreactors; 306
Proinsulin
Excretion, *Escherichia coli*, Immobilized, Recombinant; 601
Protease
Electrophoresis, Mycoparasitism, Chromatography, *Trichoderma harzianum*, 1,3-β-D glucanase, Chitinase; 180
Enzymatic hydrolysis, Milk proteins, Immobilized cells, Calcium alginate, *Serratia marcescens*; 2
Protein hydrolysate
Chlorella, *Scenedesmus*, Green algae, Enzymatic hydrolysis; 233
Protein purification
Polyampholytes, Aqueous two-phase partition, Acrylic polymers; 115
Protein release
Mixer mill, Wet grinding, Small-scale disruption, Disintegration of microorganisms, Intracellular enzymes, Mechanical cell rupture; 552
Pseudomonas
Mutant, Benzene degradation, Benzeneglycol formation; 134
Pullulan
PHB, Biopolymer, Batch kinetics, Xanthan; 326
Pulp mill effluent
Single cell protein, Fed batch fermentation, Yeast, Mold; 280
Purification
Characterization, Cellooligosaccharides. Reaction mode, Transglycosylation, *Bacillus subtilis*, *Bacillus megaterium* (pCK98), Endo-β-1,4-glucanase; 347
Pectin hydrolase, Pectin lyase, *Aureobasidum pullulans*; 682
Purification and characterization
Aspergillus japonicus, Endoglucanase, Multiple forms; 100
Aspergillus japonicus, Extracellular β-glucosidase; 91

Raw starch
Starch-digestive amylase, Photosynthetic bacterium; 173
Reaction mode
Transglycosylation, *Bacillus subtilis*, *Bacillus megaterium* (pCK98), Endo-β-1,4-glucanase, Purification, Characterization, Cellooligosaccharides; 347
Reactor performance
Hydroxysteroid dehydrogenases, Two-phase systems, Steroids, Coenzyme regeneration; 333
Recombinant
Proinsulin, Excretion, *Escherichia coli*, Immobilized; 601
Regulation
Induction, Cellulase, *Thermoascus aurantiacus*, Thermophilic fungus, Derepression; 262
Reverse hydrolysis
Equilibrium shift, Hydration history; 486
Reversed micelle
Invertase, Sodium lauryl sulfate, Sodium tauroglycocholate, Enzyme; 302
Rhamnose
Fucose, Microbial polysaccharides, Furaneol, Flavoring agent, 6-deoxysugars; 198
Rheological characterization
Dextran, Dextran fermentation, *Leuconostoc mesenteroides*, Microbial exopolysaccharides; 686
Riboflavin production
Kinetics, Brewers' yeast;
Ruminococcus albus
β-glucosidase, *Escherichia coli*, Molecular cloning; 559

Saccharification
Bacterial cellulases, Lignocellulosics; 750
Glucoamylase, Starch, Ultrafiltration reactor; 736
Saccharomyces cerevisiae
Aspergillus lipase, Enantioselective hydrolysis, Pantoyl lactone; 689
Enantioselective hydrolysis, carboxyl esterase; 744
Furfural, 5-hydroxymethylfurfural, *Candida guillermondii*; 315
Organic solvents, Tolerance to ethanol, Polyacrylamide, Immobilization of yeasts; 273
Sago starch
Simultaneous saccharification and fermentation, Immobilization, *Zymomonas mobilis*, Amyloglucosidase, Ethanol production; 426
Scenedesmus
Green algae, Enzymatic hydrolysis, Protein hydrolysate, Chlorella; 233
Scenedesmus obliquus
Carrageenan, Immobilization, Oxygen, *Bacillus subtilis*; 19
Schwanniomyces castellii
Starch hydrolysis, Kinetics, Amylase; 156
Secondary metabolites
Herbicides, Antiparasitic agents, Alkaloids, Insecticides, Vasodilators, Enzyme inhibitors, Streptomyces; 455
Secretion
Yeast, 1-Deoxynojirimycin, Somatomedin C, Invertase; 246
Selected cell line
Long-term stability, *Catharanthus roseus*, Serpentine; 532
S.E.M. observation
Gel construction, Morphological development, Calcium alginate, *Trichosporon cutaneum*, Oxygen uptake rate, Effective oxygen diffusivity; 284
Serine 152
Spin label, Lipase, Coulter counter, Cooperativity, Substrate inhibition, Conformational change; 352
Serpentine
Selected cell line, Long-term stability, *Catharanthus roseus*; 532
Serratia marcescens
Protease, Enzymatic hydrolysis, Milk proteins, Immobilized cells, Calcium alginate; 2
Shear
Viability, Plant cell suspensions; 361
Silicone beads
Escherichia coli, Immobilization, Amylase; 518
Simultaneous saccharification and fermentation:
Immobilization, *Zymomonas mobilis*, Amyloglucosidase, Ethanol production, Sago starch; 426
Single cell protein
Fed batch fermentation, Yeast, Mold, Pulp mill effluent; 280
Small-scale disruption
Disintegration of microorganisms, Intracellular enzymes, Mechanical cell rupture, Protein release, Mixer mill, Wet grinding; 552
SO_2-prehydrolysis
Lignocellulosics, enzymatic saccharification, *Pichia stipitis* R, Ethanol, Extractive butanol fermentation; 660
Sodium
Toxicity, Inhibition, Methanogenesis, Granular sludge, Methanothrix, Anaerobic digestion, UASB reactor; 24
Sodium lauryl sulfate
Sodium tauroglycocholate, Enzyme, Reversed micelle, Invertase; 302
Sodium tauroglycocholate
Enzyme, Reversed micelle, Invertase, Sodium lauryl sulfate; 302
Solvent
Interesterification, Diatomaceous earth, Lipase; 47
Solvent effect
α-Chymotrypsin, Amino acid, Esterification; 582
Somatomedin C
Invertase, Secretion, Yeast, 1-Deoxynojirimycin; 246

Spin label
Lipase, Coulter counter, Cooperativity, substrate inhibition, Conformational change, Serine 152; 352
Stability
Hydrogen and oxygen production, Hydrogenase, Manganese, Divalent cations, Chloroplasts, Stacking; 123
Log P, Steroids, Arthrobacter simplex, Two-liquid phase biocatalysis, Δ^1-dehydrogenation; 669
Stabilization
Insolubilization, Covalent attachment, Glyoxyl sepharose CL gels, Immobilization; 375
Stabilizing enzymes
Immobilized enzymes, Surfactants in solution, Enzymes in organic synthesis, Biocatalysis in organic media; 710
Stacking
Stability, Hydrogen and oxygen production, Hydrogenase, Manganese, Divalent cations, Chloroplasts; 123
Starch
Ultrafiltration reactor, Saccharification, Glucoamylase; 736
Starch hydrolysis
Kinetics, Amylase, *Schwanniomyces castellii*; 156
Starch-digestive amylase
Photosynthetic bacterium, Raw starch; 173
Steam treatment
Wood sugars, Fermentation, Analysis, Chromatography; 37
Stereoselective
D-amino acids, Arthrobacter species, D-hydantoinase, Dihydropyrimidinase, D-*N*-carbamylamino acid amidohydrolase; 618
Steroids
Arthrobacter simplex, Two-liquid phase biocatalysis, Δ^1-dehydrogenation, Stability, Log p; 669
Coenzyme regeneration, Reactor performance, Hydroxysteroid dehydrogenases, Two-phase systems; 333
Stirred tank reactor
Packed bed reactor, Kinetics of saccharose hydrolysis, Immobilized bioreactors, Porous cellulose beads, Immobilized invertase; 306
Streptomyces
Secondary metabolites, Herbicides, Antiparasitic agents, Alkaloids, Insecticides, Vasodilators, Enzyme inhibitors; 455
Xylan hydrolysis, Enzyme families; 403
Streptomyces clavuligerus
Oxygen uptake, κ-carrageenan, Immobilized cells; 151
Substrate inhibition
Conformational change, Serine 152, Spin label, Lipase, Coulter counter, Cooperativity; 352
β. subtilis macrofibers
Entanglement, Physical attachment, Bacterial immobilization; 418
Surface-active agent
Extraction, Uricase, *Candida utilis*, Thiol compound, Surfactant; 52
Surfactant
Surface-active agent, Extraction, Uricase, *Candida utilis*, Thiol compound; 52
Surfactants in solution
Enzymes in organic synthesis, Biocatalysis in organic media, Stabilizing enzymes, Immobilized enzymes; 710
Synthetic reactions
Acetobacter turbidans, Cephalosporin synthesis, Hydrolytic reactions; 239

Temperature
Ionic strength, *Trichoderma reesei*, Cellulase, Adsorption, pH; 675
Temperature effect
Zymomonas mobilis, Kinetic model, Ethanol fermentation; 431
Termitomyces clypeatus
Endoxylanase, Carboxymethyl xylan, Mushroom xylanase; 563
Thermoascus aurantiacus
Thermophilic fungus, Derepression, Regulation, Induction, Cellulase; 262
Thermophilic fungus
Derepression, Regulation, Induction, Cellulase, *Thermoascus aurantiacus*; 262
Thiol compound
Surfactant, Surface-active agent, Extraction, Uricase, *Candida utilis*; 52
Thylakoids
Photosystem, Electrochemistry, Electron transfer; 691
Tolerance to ethanol
Polyacrylamide, Immobilization of yeasts, *Saccharomyces cerevisiae*, Organic solvents; 273
Toxicity
Inhibition, Methanogenesis, Granular sludge, Methanothrix, Anaerobic digestion, UASB reactor; Sodium; 24
Transglycosylation
Bacillus subtilis, *Bacillus megaterium* (pCK98), Endo-β-1,4-glucanase, Purification, Characterization, Cellooligosaccharides, Reaction mode; 347
Tributyrin
Olive oil, Lipolytic activity, Microorganisms; 492
Trichoderma harzianum
1,3-β-D glucanase, Chitinase, Protease, Electrophoresis, Mycoparasitism, Chromatography; 180
Trichoderma reesei
Cellulase, Adsorption, pH, Temperature, Ionic strength; 675
Cellulase, Hypercellulolytic mutant, Constitutive β-D-glucosidase, 341
Endoglucanases, multiple forms, Adsorption, Lignin, xylan, Inactivation, Cellulase; 503
Trichosporon cutaneum
Oxygen uptake rate, Effective oxygen diffusivity, S.E.M. observation, Gel construction, Morphological development, Calcium alginate; 284
Trypsin
Dimethyl adipimidate, Immobilized trypsin; 143
Trypsin-agarose
Insolubilization-stabilization, Enzyme-support attachment, enzyme-inhibitor; 227
Two-liquid phase biocatalysis
Δ^1-dehydrogenation, Stability, Log P, Steroids, *Arthrobacter simplex*; 669
Two-phase systems
Steroids, Coenzyme regeneration, Reactor performance, Hydroxysteroid dehydrogenases; 333
Tyrosinase
Tyrosine phenol-lyase, Tyrosine decarboxylase, Monoamine oxidase, Norlaudanosoline synthase, Codeine, Morphine, Tyrosine; 219
Tyrosine
Tyrosinase, Tyrosine phenol-lyase, Tyrosine decarboxylase, Monoamine oxidase, Norlaudanosoline synthase, Codeine, Morphine; 219
Tyrosine decarboxylase
Monoamine oxidase, Norlaudanosoline synthase, Codeine, Morphine, Tyrosine, Tyrosinase, Tyrosine phenol-lyase; 219
Tyrosine phenol-lyase
Tyrosine decarboxylase, Monoamine oxidase, Norlaudanosoline synthase, Codeine, Morphine, Tyrosine, Tyrosinase; 219

UASB reactor
Sodium, Toxicity, Inhibition, Methanogenesis, Granular sludge, Methanothrix, Anaerobic digestion; 24
Ultrafiltration reactor
Saccharification, Glucoamylase, Starch; 736
Ultraviolet mutation
Carbendazim-resistant mutant, Colony morphology, Cellulolytic activity, *Aspergillus niger*; 442
Urea
Co-immobilization, Cell/urease, Algae, Chlorella, Alginate-entrapment; 207
Uricase
Candida utilis, Thiol compound, Surfactant, Surface-active agent, Extraction; 52

Variable cell yield coefficient
Gene level control, Medium-dependent oxygen transfer model, *Kluyveromyces fragilis*, Batch fermentations; 165
Vasodilators
Enzyme inhibitors, Streptomyces, Secondary metabolites, Herbicides, Antiparasitic agents, Alkaloids, Insecticides; 455
Viability
Plant cell suspensions, Shear; 361

Wet grinding
Small-scale disruption, Disintegration of microorganisms, Intracellular enzymes, Mechanical cell rupture, Protein release, Mixer mill; 552
White-rot fungi
Immobilized fungi, Bioreactor, Fermentation, Lignin peroxidase, Ligninase, Enzyme production, *Phanerochaete chrysosporium*; 410
Wood sugars
Fermentation, Analysis, Chromatography, Steam treatment; 37

Xanthan
Pullulan, PHB, Biopolymer, Batch kinetics; 326
Xylan hydrolysis
Enzyme families, Streptomyces; 403

Xylitol
Yeast, *Pachysolen tannophilus, Candida guilliermondii*, Growth, Limitation, Biotin, D-xylose, Ethanol; 81
Xylose
Fermentation, Yeasts, Bacteria, Fungi, Batch fermentation, Continuous fermentation; 66
D-xylose
Ethanol, Xylitol, Yeast, *Pachysolen tannophilus, Candida guilliermondii*, Growth, Limitation, Biotin; 81
Xylose isomerase
Acinetobacter calcoaceticus, Immobilization, D-xylulose; 537
D-Xylose isomerase
Denaturating conditions, Metal(II) effects; 695
D-xylulose
Xylose isomerase, *Acinetobacter calcoaceticus*, Immobilization; 537

Yeast
1-Deoxynojirimycin, Somatomedin C, Invertase, Secretion; 246
Mold, Pulp mill effluent, Single cell protein, Fed batch fermentation; 280
Hansenula polymorpha, Candida boidinii, Candida utilis, Lysis, Microbial food, Glycogen; 586
Kluyveromyces fragilis, Exo-inulase, β-fructofuranosidase, Continuous culture, Enzyme overproduction; 297
Pachysolen tannophilus, Candida guilliermondii, Growth, Limitation, Biotin, D-xylose, Ethanol, Xylitol; 81
Yeasts
Bacteria, Fungi, Batch fermentation, Continuous fermentation, Xylose, Fermentation; 66

Zonal affinity chromatography
Batch adsorption, Dual character adsorption, Porous cellulose beads, Anthraquinone dyes, Lactate dehydrogenase; 568
Zymomonas mobilis
Amyloglucosidase, Ethanol production, Sago starch, Simultaneous saccharification and fermentation, Immobilization; 426
Zymomonas mobilis
Kinetic model, Ethanol fermentation, Temperature effect; 431
